

Kanjo

SUMMARY

Kanjo (勘定) is a personal financial ledger built for builders, self-hosters, and engineers.

PROJECTS

Kanjo | A Quiet Ledger for Life and Projects

- Kanjo treats money as a resource system rather than a collection of expenses.
- Focuses on understanding operational state of finances: monthly burn, savings rate, runway, cash flow, and project costs.
- Organizes finance around operations (e.g., housing, transportation, food, infrastructure, projects, hobbies).
- Includes dashboard, ledger, accounts, categories, projects, and reports in MVP scope.
- Excludes bank sync, OCR, receipt scanning, AI features, investment tracking, budgeting systems, multi-user support, PWA support, and mobile app.

TECHNICAL SKILLS

React
TypeScript
Vite
React Router
TanStack Query
Shadcn UI
Lucide
React Hook Form
Zod
Recharts
Go
Chi
PostgreSQL
sqlc
goose
Docker
Caddy
VPS

PHILOSOPHY

Money Is Fuel; Clarity Over Accounting; Systems Thinking; Intentional Spending; Operational View.

DESIGN PHILOSOPHY

Japanese ledger-inspired visual style: traditional accounting books, Japanese stationery, MUJI, minimal notebooks. Calm, focused, trustworthy aesthetic.

VISUAL IDENTITY

Color palette: Background #F8F5F0, Secondary Background #F1ECE4, Primary Text #2B2B2B, Secondary Text #6B6B6B, Positive #4F6F52, Negative #9B4D4D, Accent #6F5E53.

TYPOGRAPHY

Headings: Noto Serif JP (alt IBM Plex Serif). Body: Geist (alt Inter). Numeric: JetBrains Mono.

COMPONENT GUIDELINES

Cards use subtle paper styling with 1px #E5DED3 border, 8px radius, #F8F5F0 background. Tables are first-class, dense, searchable, keyboard-friendly. Charts prioritize readability with thin lines, minimal fills, limited colors, clear labels.

INFORMATION ARCHITECTURE

Dashboard metrics: Current Balance, Monthly Burn, Savings Rate, Runway, Recent Transactions. Ledger columns: Date, Description, Amount, Account, Category, Project, Tags. Accounts examples: BCA, Jago, Cash, Emergency Fund, Investments. Categories examples: Housing, Food, Transportation, Infrastructure, Projects, Hobbies, Healthcare. Projects can own transactions (e.g., LazyScan Lite with VPS, Domain, SMTP monthly cost Rp 185,000). Reports: Cash Flow, Burn Rate, Category Breakdown, Balance Trend, Project Cost Breakdown.

NON-GOALS

Not a fintech platform, budgeting coach, banking application, investment platform, or startup SaaS.

GUIDING PRINCIPLE

Every feature should improve understanding of where resources go and how sustainable current spending is.
